Modularity in the Smallest Spaces From Standard Systems to Fully Automated Production Cells

Base configuration – injection molding process

- Injection molding machine
- Mold (fully integrated hot runner)
- Sorting gate and conveyor belt
- Turnkey solution (startup, FAT, SAT)

Options – injection molding process

- MED packages
- Laminar flow unit
- Increased machine height
(facilitates cleaning process)

Base configuration – Automation

- Side entry

Options – Automation

- Fully automatic assembly and placement system
- Laminar flow unit
- Packaging system

Tailored to Production Output

Injection molding machine	ELION 500	ELION 800	ELION 800	ELION 1200	ELION 2200
Number of cavities	16	24	32	64	96
Production output (millions of units/year)*	104	156	207	415	622

* Assumption: 8000 h/year, 90% availability, 4 sec cycle time
