

Machine inspection Service & Solutions

Engineering Excellence

Regular machine inspections optimize service life

Service & Solutions

All Netstal machines not only offer outstanding reliability and efficiency but also have an extremely long service life. Regular maintenance and inspection helps you maintain these features.

Preventing machine downtimes

Many years of experience clearly show that regular machine inspections as a part of maintenance provide a verifiable reduction in downtimes.

Machine inspection

The machine inspection gives you an efficient and professional overview of the overall status of your machine. The electrical, hydraulic and mechanical components as well as the safety circuit are checked using a checklist and the current status is documented.

Options

We can tailor the machine inspection to suit your personal requirements with various clearly priced options. These include:

- Clamping force measurement
- Temperature controls
- Checking the alignment of the injection unit
- Oil analyses

Your benefits:

- Extensive, illustrated documentation of the overall status of the machine
- Overview of the recommended repair work
- Substantial reduction of downtime thanks to the ability to plan troubleshooting and repairs
- Cost savings by decreasing production downtime

Our machine inspections are carried out by trained specialists

1. Startup

2. Utilization

3. Optimization

4. Phase-out

With Service & Solutions, we give you optimal support throughout the entire lifecycle of the machine – from startup, through utilization and optimization to phase-out.

By providing solution-driven services and products, we help you maintain optimal production efficiency and thereby secure your investment.
